WORK EXPERIENCE

Cloud Engineer

Sep 2022 - Aug 2023
Kolkata, India

- Spearheaded the migration of a web application from an EC2 instance to an Amazon S3 static website, seamlessly adopting a fully serverless approach, making it highly scalable and optimizing overall cost by 20 percent.
- Implemented Amazon CloudFront distributions for optimal content delivery. CDN settings optimization to 90 percent.
- Implemented API Gateways by leveraging Lambda Functions, DynamoDB updates, and SES integration, resulting in enhanced functionality and seamless communication. the implementation of Web Application Firewall (WAF) to ensure security and protection against potential threats.
- Integration of Amazon Route 53 to manage DNS infrastructure strengthening security and reliability.
- Deployed Istio Mesh within the AWS EKS cluster to enable blue-green deployment model.
- Development of Terraform codebases for various AWS projects, enhanced code reusability.
